

February 29, 2016

Dear CHEMCAD user,

We at Chemstations are pleased and excited to announce the release of **CHEMCAD version 7.0**.

As you know, Chemstations' culture is built around listening to you, our customers, and building software that fits your workflow and your needs. We feel confident that CHEMCAD 7 will improve your process simulation experience, and help you model and optimize processes better than ever.

If you're ready to get started immediately, you can [download the software now](#).

We have been hard at work updating CHEMCAD's graphical user interface (GUI) and reporting engine, adding more modern toolsets and visual components, while continuing to improve and add engineering features. The resulting software fulfills our high-level goals for version 7.0:

- Streamline your flowsheeting work with an all-new graphical user interface
- Make graphical and tabular results look better, with more customization
- Create a foundation for future improvements to the CHEMCAD calculation engine

As this is a significant update and upgrade, you will need to import your simulations from prior versions. In addition, you may need a little help identifying and using the new features in the CHEMCAD 7 interface. There are a variety of resources available to ease the transition:

- Newly updated and annotated **CHEMCAD examples**, including a new collection of instructive examples called Process Simulation Essentials
- The **CHEMCAD User Guide**, available within the online help system or [on our website](#), which fully describes and explains the new features
- The [Chemstations YouTube channel](#), which offers a growing list of short videos highlighting some of the new and updated features
- The **Knowledge Base** within our [customer Support Center](#), which is expanding to cover items specific to version 7.0

For a high-level outline of the improvements and changes in CHEMCAD 7, please [click here](#). If you're interested in more granular detail about the changes, please see our [release notes](#).

Thank you for your continued business; Chemstations' growth and success are built firmly on the success of our customers. If you feel our products and services exceed your expectations, please take a moment to tell a friend or colleague about us.

We encourage customer feedback to keep us informed of your changing needs and enables us to meet those needs promptly and effectively. Please contact us with any questions or requests related to our products and services. The Chemstations management team strives to deliver excellence in our products and our customer service.
